

## **Mind map**

*flattened, as we computer folk would say  
can be exploded into a graph*

- **Relevant interests**
  - Computers
  - Programming languages
  - Compiler design
  - Operating systems
  - Troff typesetter
- **Previous experiences**
  - Worked on C2 and Rhai programming languages
    - C2: design
    - Rhai: design and implementation
  - Two code weeks at CA technologies/Broadcom
  - Currently working on the Meedias centralized CMS
  - Maintaining awesome-rust, a curated list of Rust projects
- **School stuff**
  - Elementary education: Podbělohorská elementary school
  - Secondary education: Johannes Kepler grammar school
  - Currently teaching programming at ^
- **Why I am interested**
  - Great opportunities cliché
  - Uses technologies I like

# Outline

**Relevant interests + Motivation** - Ever since I was a kid, I was interested in computers, probably inspired by my dad and uncle, the technical relatives. I became focused on the design and implementation of programming languages, UNIX-derived OSes, parsing and the Troff typesetter.

**Previous experiences** - I have previously worked on the C2 and Rhai programming languages and I am currently working on a centralized CMS called Meedias. I have had two code weeks at CA Technologies (recently acquired by Broadcom). I am involved with the open-source community, for example, I maintain `awesome-rust`, the curated list of Rust projects.

**School stuff** - For my elementary education, I went to the Podbělohorská elementary school. Afterwards, I went to the Johannes Kepler Gymnasium, where I am still studying now. Since two years ago, I also teach programming at the same school

**Why I am interested** - I am interested because your institution offers great opportunities, especially the opportunity to work with like-minded people using technologies that I prefer.
